TABLE FAVOUR

 15 MINUTES
OR LESS

YOU'LL NEED

- ScanNCut or DesignNCut machine
- Table favour cutting file (see below)
- Standard mat
- Standard blade
- 1 sheet scrapbooking paper 12 x 12in
- Double-sided tape

SETTINGS

Blade depth 2.5

Cut pressure 0

These are suggested settings only.
Always complete a test cut and adjust
as needed before cutting design

LET'S START

test your settings

Smooth paper onto a standard mat, right side up. Test cut and adjust settings as needed.

cut the file

Load the file and cut 1 of the design to make one favour.. Remove from mat.

fold and assemble

Fold along perforation lines. Apply double-sided tape to the right side of tab. Remove backing paper from tape and press tape in place. Fill before slotting top flaps together. And you're done!

Thread with a loop of thin ribbon to hang on your Christmas tree.
For freshness, fill on the day of serving or use wrapped sweets.
